David Antonio Brocardo

PROFESSIONAL SUMMARY:

Junior Software Developer with experience in systems, backend, data, integration, architecture, and leveraging AI tools to accelerate software delivery. Proven professional experience in Full Stack development for enterprise web applications, covering requirements analysis, feature implementation, maintenance, bug fixing, testing, and continuous improvement. Proficient in Java, JavaScript, SQL, MySQL, REST APIs, dashboard development, and system integrations. Solid Python knowledge acquired during academic training. Bachelor's degree in Computer Science from Unioeste (graduated top of the class), with experience in academic projects, scientific research, tutoring, and teamwork.

PROFESSIONAL EXPERIENCE:

- ***Junior Software Developer - EngeGOV (DHM Sistemas) (February 2026 – Present)***

Act as a Full Stack Java Developer for enterprise web applications, participating in the entire software development lifecycle, including requirements analysis, implementation, maintenance, testing, and continuous improvement.

Key Responsibilities:

- Develop and maintain web applications using Java, JavaScript, SQL, and MySQL.
- Design and implement new features while performing ongoing maintenance on existing modules.
- Identify, analyze, and resolve software bugs, contributing to application stability and reliability.
- Integrate enterprise systems with external REST APIs for secure data exchange and consumption.
- Build customized business reports using Java, SQL, and iReport.
- Develop management dashboards to monitor operational metrics, user requests, system users, and municipal data.
- Implement browser multi-tab control features using JavaScript to enhance security and prevent data inconsistency.
- Integrate OpenAI services into corporate applications to build AI-driven functionality.
- Collaborate with multidisciplinary teams adhering to agile methodologies and software engineering best practices.
- EngeGOV Revit Add-in: Developed a custom C#/WPF add-in for Autodesk Revit to automate the extraction of BIM model element quantities and convert them into construction cost estimates. Integrated with a proprietary API to update cost databases and send structured budgets directly to the enterprise web platform.

- **Software Development Intern - EngeGOV (DHM Sistemas) (June 2025 – January 2026)**
 - Full Stack development focusing on Java Web applications.
 - Fixed software bugs and implemented new system functionalities.
 - Performed database modeling and optimized SQL queries in MySQL.
 - Developed custom enterprise reports utilizing Java, iReport/Jasper, and SQL.
 - Technologies: Java, Java EE, JavaScript, MySQL, SQL, iReport/Jasper.

EDUCATION:

- **Bachelor of Science in Computer Science - State University of Western Paraná (2021– 2025)**
 - Ranked 1st in the graduating class of 2025.
 - Comprehensive coursework in software engineering processes, programming, machine learning, and databases.
 - Languages studied: C, C++, Java, Python, and JavaScript.
- **Technical Diploma in Information Technology - Federal Institute of Paraná (2017– 2020)**
 - Software development training focused on Python, Java, programming logic, and databases.

ACADEMIC & RESEARCH EXPERIENCE:

- **Tutorial Education Program — PETComp (2022–2025)**
 - Scholarship Student.
 - Engaged in teaching, scientific research, and university extension activities.
 - Served as a Teaching Assistant / Tutor for the Algorithms course.
 - Developed core competencies in project management, team collaboration, and public speaking.
- **Undergraduate Scientific Research :**
 - **Computational Thinking & Digital Technologies for Mathematics Educators (2022–2023)**
 - Scholarship Researcher;
 - Published findings at EAICT-Unioeste..
 - **Unplugged Turing Machine: Practices for Computational Thinking and Mathematics Teaching (2024–2025)**
 - Volunteer Researcher.
 - Published findings at EAICT-Unioeste..

TECHNICAL SKILLS:

- Languages: Java, JavaScript, Python, C, C++, C#;
- Web Development: Java Web, Java EE, JSF;
- APIs & Integration: REST APIs, System Integration;
- Databases: SQL, MySQL, Database Modeling & Queries;
- Reporting & Data: iReport/Jasper, Management Dashboards;
- Frameworks & Tools: Hibernate, Autodesk Revit API, OpenAI API integration.

CORE COMPETENCIES:

- Full Stack Development;
- Problem Analysis & Solving;
- Bug Fixing & Debugging;
- Teamwork & Collaboration;
- Technical Communication;
- Project Management;
- Continuous Learning;
- Agile Methodologies;
- Software Engineering.
